**ORCell™**  
Revolutionize Your Frost Protection

**Remotely monitor and  
control your Orchard-Rite  
wind machines.**

## Take control of your frost protection...

from anywhere using your computer or mobile device.

ORCell™ allows you to remotely operate, monitor, and manage your wind machines, anywhere, anytime. Our state-of-the-art cellular communication network and service work seamlessly with all Orchard-Rite® wind machines, giving you peace of mind that your crops will always be protected.

### Remotely monitor and control your Orchard-Rite® wind machines

- Monitor, start and stop your wind machines
- Adjust wind machine start and stop temperatures remotely
- Check engine status
- Monitoring of wind machine fuel tanks
- Unlimited number of users with unique user names and passwords
- Receive customized notifications via text or email
- Capable on any device: desktop, laptop, tablet or cell phone

### Collect and manage data

- Track your machine operation, fuel levels & consumption
- Easily export data to an Excel spreadsheet
- Utilize data to enhance your decisions

### Swiftly respond to emergencies

- Get e-mail or text notifications the moment an issue occurs on a number of customer specified criteria, including temperature, critical alarms, battery voltage and fuel levels
- Run diagnostics with status logs
- Know precise locations of emergencies
- Warnings are sent to all users who choose to set notifications to "On"

### With over 40 years of wind machine experience,

Orchard-Rite developed ORCell™ to give you complete control over your machines from around the world. This technology informs you in real time about the status of your machines, reducing the labor necessary to monitor them during the frost season. ORCell™ increases your team's efficiency, saving you time and effort.
